

NEUROCENTS — VIDEO 12 FINAL · PRE-PUBLISH CHECKLIST

Why Willpower Fails Every Payday · Baumeister Ego Depletion · Thaler & Benartzi · Save More Tomorrow

■■ 1. NOMBRE DEL ARCHIVO — renombrar el MP4 ANTES de subir ■■

ARCHIVO: why-willpower-fails-every-payday-automatic-savings-neurocents.mp4

■ 2. TÍTULO — testear en VidIQ antes de publicar ■

TÍTULO PRINCIPAL (outlier-validated): Why Willpower Fails Every Payday — And the One Decision That Stops It

Justificación: 132.7× outlier pattern. 'Why [X] Fails Every [Trigger]' — identidad + mecanismo + solución en 12 palabras.

Alternativa A: 'The One Decision That Defeats All Three Brain Traps' — mecanismo-first, menor CTR

Alternativa B: 'Why Your Brain Spends Every Payday (And the One Move That Stops It)' — testear score

■ El título principal tiene outlier pattern validado ('Why Willpower Fails'). Mantener si VidIQ ≥ 80 .

■■ 3. DESCRIPCIÓN — copia exactamente ■■

Alex watched the last video. He took notes. He sent it to his brother.

On Friday, the salary notification arrived — and four hundred euros were gone again.

Knowing the name of a trap is not the same as escaping it.

The real fix requires removing the decision from Alex's hands entirely — not making it easier to get right.

Roy Baumeister found that willpower depletes with every decision you make — not just financial ones.

By payday, you have the least of it exactly when you need the most.

In 1998, his radish experiment showed the mechanism clearly: same puzzle, different reserve.

Richard Thaler and Shlomo Benartzi tested the solution at the University of Chicago in 2004.

Workers who made one structural decision went from saving 3.5% to 13.6% in five years.

No budgets. No willpower. No spreadsheets.

In this video:

→ Why understanding a bias doesn't stop it from running

→ Roy Baumeister's ego depletion — the radish experiment

→ Why the standing order fires one minute before the Reward Trap

→ Save More Tomorrow (Thaler & Benartzi, 2004) — 3.5% to 13.6% in five years

→ The Brain Villain's last trick — Present Bias wearing the costume of caution

■ 5. MINIATURA ■

CONCEPTO: Alex con expresión de cansancio / revelación. **Fondo blanco estilo Andy/MoneyTom.**

TEXTO THUMBNAIL: WILLPOWER FAILS (máx 5 palabras)

OBJETO: Villain pequeño vs. standing order (flecha verde) — contraste de tamaño

Alternativa A: Alex exhausted (viernes) LEFT | Alex calm (martes) RIGHT — split panel antes/después.

Alternativa B: Villain durmiendo / vencido, Alex de pie con brazo cruzado. Alex dominante.

■ V11 usó villain activo + 3 trampas. V12: Alex dominante, villain en segundo plano o derrotado.

■ BLUE t-shirt en Alex — NO red. Verificar en Google Flow antes de generar.

■ 6. YOUTUBE STUDIO — configuración antes de publicar ■

- Título: Why Willpower Fails Every Payday — And the One Decision That Stops It
 - Descripción: Pegada completa con capítulos y URLs de V11 y V13
 - Tags: Todos pegados (ver sección 4)
 - Categoría: Education
 - Miniatura: Subida — fondo blanco, Alex dominante, texto WILLPOWER FAILS
 - Capítulos: Activados (timestamps en descripción)
 - Subtítulos: Auto-generados por YouTube (dejar activado)
 - Visibilidad: Público — programado 20:00–22:00 hora Bali (12:00–14:00 EST)
 - Marca de agua: Neurocents_Watermark.png subida en Studio
-

■ 7. END SCREEN — últimos 20 segundos ■

- Vídeo: seleccionar V13 (Tax Refund — €800 disappears 3× faster) — NO 'mejor opción'
- Botón suscripción

Script end screen: 'Watch this next — Alex gets a tax refund. Eight hundred euros he wasn't expecting. His brain treats it completely differently. The money disappears three times faster. The reason is the one nobody expects.'

■ Después de publicar V12: entrar a V11 y actualizar end screen apuntando a V12 específico.

■ 8. CARDS (tarjetas dentro del vídeo) ■

- Minuto ~1:45 (BAUMEISTER) → card apuntando a V11 (3 Traps — contexto de trampas)
 - Minuto ~5:30 (THE SCIENCE) → card apuntando a V5 (Mental Accounting — Thaler conexión)
-

■ ■ 9. PLAYLIST ■ ■

- Añadir V12 a playlist 'How Your Brain Costs You Money — Neurocents'
 - Orden sugerido: V11 → V12 → V13 (secuencia 3 Traps → One Decision → Tax Refund)
 - Pegar URL de playlist en descripción de V12
-

■ ■ 10. PRIMER COMENTARIO — fijar nada más publicar ■ ■

Alex didn't need more willpower. He needed fewer decisions.
One bank transfer, set up on a calm Tuesday — before the salary arrives.
Drop ■ if you felt the discomfort when the standing order was explained. That was the Brain Villain identifying itself.

■ ■ 11. REDDIT — publicar 1h después de que el vídeo esté live ■ ■

r/personalfinance — Primero — ahorro automático, muy activo
r/BehavioralEconomics — +30 min — Thaler & Benartzi + Baumeister
r/psychology — +30 min — ego depletion / radish experiment
r/cogsci — +30 min — sistema automático vs willpower

TÍTULO REDDIT (r/psychology / r/BehavioralEconomics):

Baumeister's 1998 radish experiment found that willpower depletes with every decision — not just financial ones. By payday (after 5 days of choosing), you have the least of it exactly when you need the most. The only real fix isn't a better budget. (Made a short video on the mechanism + the structural solution)

TÍTULO REDDIT (r/personalfinance):

Thaler & Benartzi found that one structural decision — automatic redirect on raise day — took workers from 3.5% to 13.6% savings in 5 years. No budgets, no willpower. The insight isn't the savings rate — it's why the decision needs to happen on a Tuesday, not a Friday. (Short video on the mechanism)

■ ■ 12. HORA DE PUBLICACIÓN ■ ■

BALI: 20:00 – 22:00

EST: 12:00 – 14:00 (prime time USA)

SECUENCIA: Publicar V12 máximo 7 días después de V11 — son una unidad narrativa

- V12 debe publicarse pronto después de V11 para mantener la continuidad narrativa.
-

■ ■ 13. NOTAS DE OUTLIER — por qué este título y este hook ■ ■

- TÍTULO: 'Why Willpower Fails Every Payday' — Outlier pattern validado (132.7×): 'Why [X] Fails Every [Trigger]'
 - HOOK BEAT 1: Identity-first — espectador se reconoce antes de hacer clic (3 presupuestos, ninguno sobrevivió)
 - BAUMEISTER EXPERIMENT: concreto, narrativo, contrastivo — mismo tipo de datos que generan retención alta
 - VILLAIN INOCULATION (beats 76–86): segunda persona directa en tiempo real — sella el engagement con el concepto
 - IDENTITY CLOSE: 'The programs are not broken' — cierre no moralista = mayor retención hasta el final
-
